

SMT CURRENT SENSE TRANSFORMERS

P820X Series

Height: 5.5mm Max

Footprint: 8.4mm x 7.2mm Max

Current Rating: up to 10A

Frequency Range: 50kHz to 1MHz

Lower Primary DCR version available: PA1005.XXX series

Electrical Specifications @ 25°C — Operating Temperature -40°C to +130°C

| Part ^{6,7} Number | Turns Ratio | Current ² Rating (A) | Secondary Inductance (mH MIN) | DCR (mΩ MAX) | | Hipot (V _{RMS}) |

NOTES:

1. The temperature of the component (ambient temperature plus temperature rise) must be within the specified operating temperature range.
2. The maximum current rating is based upon temperature rise of the component and represents the DC current which will cause a typical temperature rise of 40°C with no airflow when both one turn windings connected in parallel.
3. To calculate the value of the terminating resistor (R_t) use the following formula: R_t (Ω) = V_{ref} * N / (I_{peak_primary})
4. The peak flux density of the device must remain below 2000 Gauss. To calculate the peak flux density for uni-polar current use following formula:

$$B_{PK} = 37.59 * V_{REF} * (\text{Duty_Cycle_Max}) * 10^5 / (N * \text{Freq_kHz})$$

* for bi-polar current applications divide B_{PK} (as calculated above) by 2.

5. Part numbers **P8222** to **P8229** are reverse polarity versions of **P820X**.
6. Optional Tape & Reel packaging can be ordered by adding a "T" suffix to the part number (i.e. P8202NL becomes P8202NLT). Pulse complies to industry standard tape and reel specification EIA481.
7. The "NL" suffix indicates an RoHS-compliant part number. Non-NL suffixed parts are not necessarily RoHS compliant, but are electrically and mechanically equivalent to NL versions. If a part number does not have the "NL" suffix, but an RoHS compliant version is required, please contact Pulse for availability.
